

VISMARA V 80

Launched in 2009 to designs by Mani Frers and in collaboration with Alessandro Vismara, WHITE DUMBO is a 25m high-tech and high-performance ocean cruiser constructed in pre-preg carbon composites by Luciano Corradi Costruzioni Nautiche with project management by naval architect Valerio Galigani. Her waterlines are an evolution of the Wally 77' design, but with a slightly more classic line and reverse stern with drop-down platform. Effortless sailing is afforded by her push-button Offshore Spars carbon rig with Cariboni Magictrim main and Reckman hydraulic furling jib with self-tacking genoa.

Guest comfort on deck is catered for by large forward cockpit area, free of control lines and boasting a large table (with liferaft stowage within) for ten guest. This cockpit area remains protected by wind and sun thanks to a large sprayhood and a rigid bimini top. In rainy days additional sections can be mounted together in order to obtain a complete protection. Fitment of an APM telescopic t-bulb keel allows easy

navigation into marinas and anchorages with 2.40m minimum draft, while extending to 4.00m to make maximum use of her powerful rig plan.

DECK EQUIPMENT
